

# Sprint Retrospective, Iteration # 2

User Story	Task	Task Assigned To	Estimated Effort per Task <i>(in hours per person assigned to the task)</i>	Actual Effort per Task <i>(in hours per person)</i>	Done (Yes/No)	Notes
As a software engineer I want to have a clear product vision	Do literature study for improving the product vision	Stefan, Nick	4	6	Yes	More work than expected, good references are hard to find. Everyone eventually helped us out as well.
	Work with the feedback in order to improve the product vision text.	Nick, Stefan	4	2	Yes	Was not as much feedback as the draft was lacking
As a software engineer I want to have an initial plan of how the product will be built	Work with the feedback in order to improve the product planning text.	Hao Ming, Diony	4	4	Yes	Improved and handed in
As a GOAL programmer I want to be able to run a GOAL bot in tygron	Make sure the GOAL code runs.	Diony, Levi	2	2	Yes	Tygron updated their environment and the code now runs
	Make a primitive goal bot.	All	5	1	Yes	They actually already had one as an example agent

As a context-group we want to have created the scenario in tygron	Create a game instance of TUDelft area	Stefan, Hao Ming	2	1	Yes	
	Discuss and plan which indicators we are going to use.	All	4	3	Yes	
	Add our stakeholder and indicators that are relevant.	Stefan, Hao Ming	3	2	Yes	
As a software engineer I want to keep an sketch of the architecture design	Write the plan (+ bit of the connector) for the agent as the Architecture Design document	Levi, Diony, Nick	4	2	No	There was no progression yet in our understanding of the connector because it was not working until wednesday.
As a student I want to pass the Project Skills part of the ContextProject	Write the one page essay for project skills	All	4	4	Yes	
As a software engineer I want to have Continuous Integration in the repository	Finish the CI with Travis for the connector	Levi	3	3	Yes	
	Explore possibility for Continuous integration for Goal	Levi	2	2	Yes	It's possible to implement it. One way would be to output the test log to an other program

Context Project: Virtual Humans  
Group: danshal

# Main Problems Encountered

## **Problem 1**

Description: Literature study was more work as expected.

Reaction: Everyone got together to finish it. But the result was suboptimal. With more time we could have gotten deeper in the literature study and write a more critical vision.

## Adjustments for the next Sprint

For the next sprint the report parts will not be underestimated and be given more time/ more people to work on.
